

Borrowing from your retirement plan

If you have a large, unexpected expense, you may find you need to take out a loan. Should you borrow from your retirement plan or an outside lender? Before you decide, make sure you consider the advantages and disadvantages of taking a loan from your retirement plan account.

Advantages	Disadvantages
 Easy money Borrowing from your retirement plan is quick and easy. You can apply for a retirement plan loan for any reason. While your plan probably will have limits on the amount you can borrow, any fees charged in connection with the loan are likely to be modest.  Simple repayment You won't have to pay interest to an outside lender. You'll pay the loan interest and principal amount back to your plan account. Repayment is simple since the money is taken directly out of your paycheck through automatic payroll deduction. Plus, your plan's interest rate may be relatively low compared to other lenders' rates.  Credit rating reprieve Taking out a loan from your retirement plan will have no impact on your credit rating. Unlike a bank or outside lender, a retirement plan doesn't report loan activity to credit rating agencies.	 Tax toll Unlike regular retirement plan salary deferrals, loan repayments aren't pretax. You'll have to pay income taxes on the earnings you use to repay the loan and then pay taxes again in the year you receive taxable distributions of the repaid amounts from your plan.  Giving up growth When you take a loan from your plan, the money you borrow will no longer be invested and potentially benefiting from tax-deferred growth. Over time, through compounding, the growth you give up could be significant.  Difficult to repay loan and still save Your plan generally will require you to pay back the loan within five years. Not making any contributions during that time could reduce the amount you're able to accumulate for retirement.  Loan due if you switch employers If you leave your job while you still have a plan loan outstanding, you could have a tax problem. If you can't repay the loan, you'll have to pay income taxes on whatever amount you still owe and, possibly, a 10% early withdrawal penalty.

There are some advantages to borrowing from your retirement plan. However, you should also consider the disadvantages of this option because you don't want to shortchange your retirement.
